

AgriNovus
INDIANA

AG + BIO + SCIENCE

where food, agriculture, science and technology converge

INDIANA IS CULTIVATING DIVERSITY + HARVESTING SUCCESS

A COMMITMENT TO INNOVATION

Across the state, Hoosiers are forging ahead, focused on tackling critical world challenges in food security and animal health.

*In Greenfield, **Elanco's** digital transformation is accelerating as the company probes its troves of big data for connections among disease, productivity and animal-health optimization. Similarly, **Corteva Agriscience**, which selected Indianapolis to be one of its leading global R&D hubs, is utilizing digital technologies and seed product development tools like gene editing to offer farmers integrated solutions for their most pressing challenges.*

Thanks to unique, strategic partnerships between Indiana State Government, AgriNovus and industry stakeholders, agbiosciences momentum in Indiana is unmatched. And innovative companies from around the world are taking notice and joining the movement.

- Indiana Economic Development Corporation (IEDC) 2018 Annual Report

A Flagship Pioneering Company

2nd U.S. Location in West Lafayette - from Cambridge, MA

North American Headquarters in West Lafayette - based in Brazil
